## How To Tie an Unified Stock Tie

1 Place the tie around the neck and secure it to the shirt by the loose end.

2 Take the right end and pass it over and under the left end (keeping the left end hanging down).

3 A loop is now made from the right end, and the left end is passed through this.

4 Pullers to have a smooth knot/loop.

5 Draw the ends as downward and hold with the second finger of the right hand.

6 Secure in this form with a finger. This must be straight after having secured both ends into the knot.
